**Cenfura announces a long term partnership with Greenstone Energy (RF) Ltd to provide EPC services in South Africa and Nigeria.**

Gibraltar (Wednesday 20 April 2022) – Cenfura is proud to begin operations in conjunction with [Greenstone Energy \(RF\) Ltd](#) as its EPC partner in South Africa and Nigeria.

Greenstone Energy provides clean, affordable and independent power to commercial and industrial sector clients and deploys a scalable digital platform capable of monitoring, controlling and optimising power generation plants even in the most remote locations. Greenstone Energy is the ideal partner to assist in implementing locally the unique blend of next generation financial services and energy implementation Cenfura offers.

Greenstone Energy's role in the implementation of Cenfura services is that of a partner for actual on the ground implementation of Cenfura projects, including some sourcing, provisioning, construction and testing.

Cenfura is part of the Nigerian Government plans to provide 5 million solar connections to the people of Nigeria. This brings an expectation of strong in country workforce and operations, which Greenstone Energy provides.

Pasi Nieminen, Founder of Cenfura said, *“Greenstone Energy fulfils all of Cenfura’s needs for an EPC partner, and offers a strong partnership for mutual success. We are proud to be working together to provide essential services to the people of Nigeria and South Africa”*

### **About Cenfura**

Cenfura is a technology company developing digital payment technologies for smart energy services. We deploy systems to dramatically increase efficiency over traditional energy payment providers.

Our solution incorporates blockchain-enabled digital payments to handle the complexities of energy transactions as well as other types of transactions. We can deploy in regions where payment instability is a serious problem and can cause significant disruptions. We stand at the intersection of financial technology & energy.

Cenfura incorporates cutting edge technology to deliver holistic solutions to our end users. We can provide scalable solutions to individual consumers, communities, industrial consumers/producers, and government entities.

### **About Greenstone Energy**

Greenstone Energy is a modern, independent utility driven by a core team of energy and financial specialists with deep expertise in leading-edge renewable energy technologies and innovative fin-tech solutions.

Greenstone provides clean, affordable and independent power to commercial and industrial sector clients and deploys a scalable digital platform capable of monitoring, controlling and optimising power generation plants even in the most remote locations.

Similarly Greenstone uses the same cloud-based platform to provide secure, access controlled real-time billing and financial information to clients, investors and partners. This allows our customers and partners to have greater control and visibility of their energy resources and investments.
